

Email Archive Manager software

KEY CUSTOMER BENEFITS

With StorageTek® Email Archive Manager software, your business will benefit from:

Increased or unlimited mailbox size. Email Archive Manager software improves or eliminates size restrictions on email boxes and, potentially, messages and their attachments.

Freestanding email archiving software. Isolated operation provides fast deployment and easy, seamless integration.

Ease of use. Auto discovery and other capabilities ensure an immediate, reliable solution with little IT effort or cost.

Low cost archiving. Integration with StorageTek Application Storage Manager™ (ASM) software for NT operating systems and ASM software for Unix operating systems allows migration to cost-effective tape libraries.

Built-in scalability. Solution scales for organizations of all sizes and demands.

A single, reliable source. Single source software, storage, standardized media and maintenance saves money and resources.

Free up space, improve server performance, ensure fast retrieval of archived email

Storage is the largest single problem in messaging today. Yet the solution could not be simpler. As a part of the Email Xcelerator™ software family from StorageTek®, Email Archive Manager software integrates seamlessly and transparently into a Microsoft Exchange or Lotus Notes system.

Email Archive Manager makes it easy to manage email storage by offloading attachments with copies of the message to remote archive servers and storage, freeing up precious space and reducing the risk of downtime. Server performance can be dramatically improved. And archived emails and attachments are stored in their original form and quickly accessed like any other email message.

Access, store and manage information quicker from anywhere

Add StorageTek Application Storage Manager™ (ASM) software to your Email Archive Manager solution and you can integrate tape and disk into a seamless storage system and control storage costs throughout the information lifecycle. Now, you can easily manage data across a multi-tiered storage hierarchy, including automatically migrating email assets from the server to economical tape for archiving. These archives can be managed from anywhere and accessed quickly by the system administrator or end user.

In addition, Email Archive Manager requires no software on email servers or clients. With nothing to integrate, deployment is rapid and disruption-free. As needs change, Email Archive Manager software easily scales to meet them. There are no additional demands on IT staff or time. Expensive image backups for email are reduced. And losing employee time to individual mailbox management is no longer at issue.

About StorageTek®

StorageTek® (NYSE:STK), a \$2 billion worldwide company with headquarters in Louisville, Colo., delivers a broad range of storage solutions for digitized data. StorageTek solutions are easy to manage and allow universal access to data across servers, media types and storage networks. StorageTek is the innovator and global leader in virtual storage solutions for tape automation, disk storage systems and storage networking. Because of StorageTek, customers can manage and leverage their digital assets as their businesses grow, and can maximize IT productivity to ensure enterprise-class business continuity.
